Hong Kong Exchanges and Clearing Limited and The Stock Exchange of Hong Kong Limited (the “Stock Exchange”) take no responsibility for the contents of this announcement, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement. BUSINESS AND FINANCIAL REVIEW

Turnover

For the nine months ended 30 September 2015, the Group recorded a turnover of approximately RMB55,332,000 (nine months ended 30 September 2014: RMB102,537,000), representing a decrease of approximately 46% over the corresponding period of last year because customers stop ordering or ordering less due to the weak economic environment in China. In addition, change in business model from sales of sanitary-ware and other products to commission income received on trading of sanitary-ware and other products also lead to the decrease in turnover compared with the period ended 30 September 2014.

Gross profit

For the nine months ended 30 September 2015, the Group recorded overall gross profit of approximately RMB12,486,000 (nine months ended 30 September 2014: RMB20,045,000), representing a gross profit ratio of 23% comparing to 20% for the corresponding period of last year. The increase was mainly attributed to change in business model from sales of sanitary-ware and other products to commission income received on trading of sanitary-ware and other products.

Other income and gains

Other income and gains for the nine months ended 30 September 2015 decreased by approximately RMB80,000 from RMB1,399,000 for the nine months ended 30 September 2014 to approximately RMB1,319,000. This is mainly due to the decrease in sales of scraps because of the decrease in productions.

Selling and distribution expenses

For the nine months ended 30 September 2015, the Group's selling and distribution expenses decreased to approximately RMB2,335,000 from RMB2,553,000, representing a decrease of 8.5% over the corresponding period of last year, mainly because of a decrease in sales.

Administrative expenses

For the nine months ended 30 September 2015, the Group's administrative expenses amounted to approximately RMB10,314,000 (nine months ended 30 September 2014: RMB11,738,000), representing a decrease of approximately 12.1% over the corresponding period of last year. This is mainly attributable to tight control on administrative expenses.

Finance costs

No finance costs were recorded for the nine months ended 30 September 2015 and 2014.

Profit for the period

For the nine months ended 30 September 2015, the Group recorded profit for the period of approximately RMB53,000 (nine months ended 30 September 2014: RMB5,815,000), representing a decrease of approximately 99.1%, which was primary attributable to the weak economic environment in China and customers have ordering less or stopped ordering.

Income tax

Pursuant to the relevant PRC tax regulations, the Enterprise Income Tax (“EIT”) rate is 25%.

The EIT is calculated on the estimated assessable profits at 25% for the nine months ended 30 September 2015 after offsetting against tax losses brought forward from previous years (nine months ended 30 September 2014: 25%).

Non-controlling interests

For the nine months ended 30 September 2015, loss for the period attributable to non-controlling interests are approximately RMB462,000 (nine months ended 30 September 2014: profit RMB256,000).

PROSPECT

The Company’s fire extinguisher products cover three categories, carbon dioxide, water-based, and dry powder. The wide product range offered by the Company can meet the diversified needs of the customers. In addition, the Company’s fire extinguishers for non-marine use are granted the Certificate for Product Type Approval by the CCCF and its fire extinguishers for marine use are granted the Certificates of Type Approval by the China Classification Society, Shanghai Branch (“CCS”). The Company’s pressure cylinders have obtained the manufacture licence in the PRC and they meet the quality standards or requirements of the USA and the European Union.

Measures have been and will be implemented continuously to improve the operation efficiency and to control production costs. Production will be more focused on higher-margin products and production of lower-margin products will be reduced to raise the overall profit margin of the Company. With the economic uncertainties continue to grow in China in 2015, the Company intends to improve the profitability of the Group by increasing the operation efficiency and reducing the overhead expenses. Production in Shanghai Qingpu Fire Fighting Equipment Company Limited, Jiangshan Branch Company (“Jiangshan Branch”) has been stopped as part of overhead expenses reduction plan in 2014. During the year, the Company has tried to consolidate the production plants to enhance the production efficiency. However, due to the rapid changes in market situations, the consolidation has not yet been completed. The Company is still looking for opportunities to improve the effectiveness and efficiency of the Company’s business, not only by consolidation of production plants, but other opportunities such as merger and acquisition of business which has synergy with the existing business of the Company when opportunities come.

The Company considers that there is business potential in the market for the provision of fire consulting and testing services as there are approximately 25 companies licensed to provide such services in Shanghai, but according to the Shanghai government policy, all new buildings are required to pass the fire safety test and all existing buildings are subject to annual fire safety inspection. The Company is considering to expand into such business and/or related business in Shanghai and/or other Provinces in China.

LONG TERM STRATEGY

We believe that the Company, with our experienced management team, firm and clear development directions, the manufacturing of quality products and the provision of quality services, will be able to sharpen our competitive edge. The Company will continue to develop new market of higher-margin products/businesses and also prudently consider acquiring relevant enterprises which possess sound profitability by way of capital increment in accordance with the relevant laws and regulations in order to accelerate the growth of our profitability so that the Company will become a major enterprise in the manufacturing and sale of fire-fighting equipment and relevant business in the PRC and overseas. The Group is also actively seeking for opportunity to consolidate production procedures and plants in order to further reduce overhead expenses and maximize production efficiency.
